Project Progress Report -1

Name: Thanvendra Eswar Amara
Student ID: 02035530
Git User ID: amarathanvi
Project: CarKonnect: An app to find used cars and spare parts

What Am I Proud about:

- Here I have created a web page with the required buttons and also created html and CSS page. I have modified the CSS as needed.
- I also created specific buttons for different options and filters.
- So the page I have created is the basic page for now we may also edit the page as per need so I still want to update the page in future.

Next Steps :

- Need to connect with API's
- Work on backend frame work
- Collect the data for used cars
